Arqua Dog Bubbler DF4-DB, Electropolished finish

always improving

The Arqua Fountain has been continuously refined since its first release in 2004. Here are 6 new features that make this innovative product stand out.

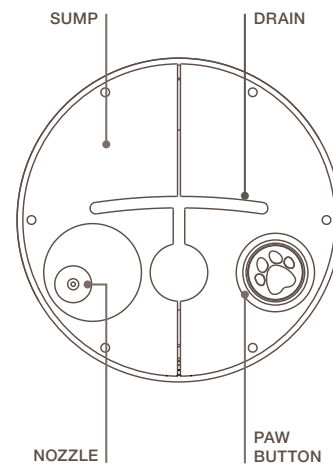

button upgrade

Stainless steel 316 valve components now feature teflon-coating for smoother pushing action

integrated dog bubbler

Step on the paw button to hydrate your dog. Water drains immediately after use for optimum hygiene. Eliminates bowl and stagnant water

maximum strength

The blade is now curved in two directions to withstand even more force

vandal-resistance

The fountain uses extra-strong hardware designed for heavy-duty use in prisons. In the rare case of vandalism, spare parts are readily available

refill, not landfill

Filling a 600ml bottle is easy with the unique nozzle and fountain profile

accessible

The Arqua Fountain uses universal design principles to meet DDA requirements. It is shaped for all ages, and is accessible to wheelchair-users

extra marine-grade option

Choose the electropolished stainless steel 316 body option for maximum performance by the sea

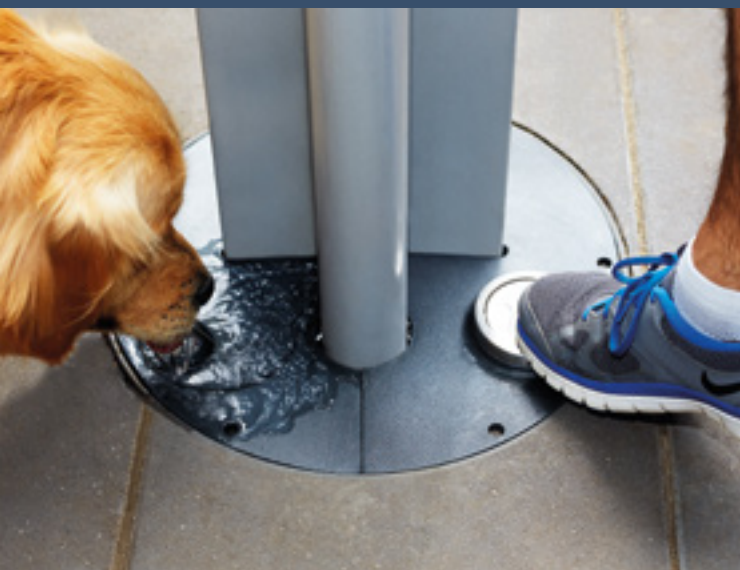

refill

Designed to fill a 600ml bottle

drink

Release water to drink

hydrate

Step on the paw button to hydrate your dog

all-in-one

Refill your bottle
Take a drink
Hydrate your dog
