waste tracking made easy

networked

solar powered

geolocated

monitors fill level

detects fire

treads lightly on  
the planet

Escola SmartBin gives you visibility

# Know exactly when and where your bins need emptying.

Escola SmartBin lets you know when your bin is full or is about to reach maximum capacity. It can tell you when it was last emptied, and immediately alerts you to fire for increased safety.

Using European sensor technology, all the data is beautifully laid out in an interactive map so even the most remote locations can be managed with ease.

Each bin can be fitted with interactive audio sensors that applaud good citizens for making deposits. Customise your responses, make them as local as you like.

All in Escola's popular compact footprint, which reduces visual clutter on the street, and fitted with solar power so it's off your grid.

Escola SmartBin saves money, time and the environment. It is a simple and low-risk solution to add smarts to waste management.

Available in 2018.
